

## Announcement

### Master Thesis Research Opportunities

## Tekeze Atbara Sub-basin

The Hydraulic Research Center (HRC) is looking for highly motivated candidates to conduct MSc research studies under the umbrella of project “*The Tekeze-Atbara sub-basin: From river basin simulations towards cooperative approaches for transboundary water management*”, jointly conducted with EiWR and IHE (for more information about project [click here](#)).

The research is on the following topics:

- Possible institutional structures for cooperation on transboundary water management in the Nile: case study of the Tekeze-Atbara sub-basin.
- Basin scale issues versus international water law: case study of the Tekeze-Atbara sub-basin in the Nile basin.

### Prerequisites:

- Excellent command of English Language and excellent academic qualifications (First Class or 2nd Class Division -I).
- Bachelor in Law, Political Science or other related fields.
- The candidate should be enrolled in a master program in an accredited University in Sudan or abroad by courses or research.
- Good knowledge of international law, hydro-politics and water diplomacy is preferable.

### What will be supported?

The project will provide available data for the MSc research and monthly stipend for researcher based on his/her research output.
